PROFILE Results-driven Data Analyst specialized in designing and implementing end-to-end data environments, structuring analytical architectures from operational systems to cloud-based data warehouses. Proven track record in building scalable ETL/ELT pipelines, automating data workflows, and delivering KPI-driven dashboards that enhance business visibility and strategic decision-making. Expert in SQL, Power BI (DAX & data modeling), and dimensional modeling within AWS environments. Continuously advancing technical expertise in data engineering, analytics, and machine learning, with a long-term focus on building high-impact, scalable data solutions.

EMPLOYMENT HISTORY

Oct 2025 — Present	Data Analyst, VarejinhoFortaleza, Ceará - Structured the Data function from the ground up, defining governance standards, analytical workflows, and scalable data processes. - Designed and implemented a dimensional Data Warehouse (Star Schema), enabling centralized reporting and cross-unit performance analysis. - Built and automated SQL-based ETL/ELT pipelines integrating ERP and operational systems into analytics-ready environments. - Developed KPI-driven dashboards in Power BI to support strategic and operational decision-making across retail units. - Designed a cloud-based data architecture on AWS (Amazon S3), ensuring structured storage and optimized data consumption. - Integrated cloud databases directly with Power BI, enabling automated refresh and reducing manual reporting efforts
Feb 2025 — Aug 2025	Data Analyst, BlitzfuchsWieseth, Bavaria International Project – 100% English Environment - Participation in an international project for data analysis and structuring for operational optimization. - Development and implementation of models, databases, and information flows. - Creation of inventory control and indicator monitoring systems. - Construction of interactive dashboards and system integration via database. - Organization and standardization of data to support operations and decision-making.
Jan 2024 — May 2024	Data Analyst, SegurobetFortaleza, Ceará - Developed interactive dashboards and analytical models in Power BI to support financial and operational decision-making. - Structured, cleaned, and standardized databases to ensure data consistency and reporting accuracy. - Automated operational and financial reporting routines, reducing manual processes and improving efficiency. - Integrated financial systems via API to centralize data and enable automated updates. - Conducted exploratory data analysis and built KPI frameworks to support performance monitoring. - Optimized internal processes through data-driven insights and structured reporting solutions.
Mar 2023 — Nov 2023	Product Support Intern, CaterpillarFortaleza, Ceará - Monitoring sales and performance indicators for the parts division. - Creating reports and dashboards to support decision-making. - Providing analytical support to sales teams.
Oct 2022 — Mar 2023	Inside Sales Intern, SuperfreteFortaleza, Ceará - Monitoring sales and performance indicators. - Generating insights to optimize communication and customer experience. - Customer service and operational support.

May 2022 — Aug 2022	Credit Analysis Intern, Sicredi	Fortaleza, Ceará
	• Data analysis and report preparation to support the credit cycle. • Clients monitoring and identification of risks and opportunities. • Presentations to support the credit team's decision-making.	
Aug 2021 — May 2022	Financial and Administrative Intern, Despacho Rápido	Fortaleza, Ceará
	• Control of accounts receivable and monitoring of cash flow. • Preparation of daily financial reports. • Support for fiscal and administrative routines.	

EDUCATION

Jan 2021 — Jul 2024	Bachelor's Degree in Business Administration, University of Fortaleza (UNIFOR)	Fortaleza, Ceará
	• Core coursework in Finance, Economics, Strategic Management, and Operations • Quantitative analysis and business performance evaluation • Financial reporting, budgeting, and cost analysis • Development of analytical and structured problem-solving skills • Academic projects focused on KPI analysis and decision support	
Oct 2025 — Present	MBA in Data Science & Analytics, University of São Paulo (USP)	São Paulo
	• Comprehensive postgraduate training in Data Science, Analytics, and Artificial Intelligence • Application of statistical methods, predictive modeling, and machine learning for business insights • Techniques in data management, big data concepts, and advanced analytical methods • Focus on transforming raw data into actionable information to support decision-making • Development of practical, real-world projects using data-driven strategies	

SKILLS	Data Warehousing & Dimensional Modeling	Expert	ETL/ELT Development	Experienced
			AWS Data Architecture	Experienced
	SQL (MySQL, PostgreSQL)	Expert	Data Analysis & KPI	Expert
	Power BI (DAX & Data Modeling)	Expert	Development	

LANGUAGES	English	C2	Portuguese	Native speaker
-----------	---------	----	------------	----------------

COURSES	Google Advanced Data Analytics Professional Certificate, Google
	Professional Program in Data Science, Infinity School
	Pentaho Data Integration (ETL), Udemy
	Advanced Power BI, Alura / Infinity School
